bio

Fuelled by a passion for building compelling products, I have a desire to excel and continuously improve in my work. Always up for a challenge, I love working with people I can learn from so that I'm always growing.

skills

typescript, react, tailwindcss, nextjs, graphql, nodejs, ux design, usability, end-to-end testing, unit testing

experience

Senior Software Engineer, Trellis (June 2021 - Present)

With Trellis being a small, Series A startup, I was able to flex my skills in ways I've never been able to before. I had a lot of autonomy to learn and do what I needed to get a job done. My Typescript and GraphQL skills got the most polishing at this role.

Senior Software Engineer, SemanticBits (Nov 2020 - June 2021)

SemanticBits was a trial of agility consistency and quality for me. They pushed me to really sharpen my TDD, Typescript, and agile development skillsets. This was a high efficiency, high visibility, high autonomy environment.
